

WRITTEN SUBMISSION FROM ALISON MITCHELL

Dear Convener of the TICC Committee

Can you please accept this as my response to the Climate Change (Scotland) Bill.

Climate change matters to me because we are only caretakers in this world and if we are selfish enough to continue on the path of carrying on regardless there will be nothing for future generations to pass on. We must have a clear strategy now and the Bill must ensure that we act now and in an effective manner.

Most people in Scotland are aware of the gravity of Climate Change but it should be everybody and not most people.

Yours sincerely
Miss Alison Mitchell
