

WRITTEN SUBMISSION FROM PAULA SANKELO

Dear Convener of the TICC Committee

I have just this week started my climate-related research in the University of Glasgow. I am writing to express my ardent wishes concerning the Scottish Climate Change Bill. I think it's vitally important that:

-the Bill requires at least a 3% reduction in emissions from the very beginning, not from year 2020 (as it will be too late by then)

-the Bill addresses the emissions from international aviation and shipping, from the very beginning (for the same reason as above)

-the Bill sets a limit on the amount of emissions reductions that Scotland can buy from overseas (to preserve its effectiveness)

-that all emissions are counted, including consumption based (as changes in our consumption habits are inevitable, if the global warming is to be tackled at all)

I trust you will do your best to preserve all life on the only planet we have!

Yours,

Paula Sankelo
